

# Phase 1:

need to be designed

(Single button to get started)

★ no need to pass credentials  
(handled by spotify)

handled  
by spotify

{ no need to design }

After login (need to display  
retrieved  
playlists  
first)

A hand-drawn sketch of a user profile page. It consists of a large rectangle representing the page. Inside, at the top, is the text 'User name: - - -'. Below that is the text 'Playlists' followed by a right-pointing curly bracket. Underneath the bracket is a large empty rectangular box, likely intended for a list of playlists. To the right of this box, there is an arrow pointing from the text 'design accordingly' towards the box.

design  
accordingly

CAN ALSO SHOW SONGS  
UNDER EACH PLAYLIST

Only if user wants, we will  
be having a list in backend for the  
migration
